STANDARD SHIP QUESTIONNAIRE

To protect your interests and the overall safety of the operation we require that the vessels must be physically suitable for the operation and have approval from the oil major. We will require our Ships Standards Questionnaire (OPS-OFD-001A) completed for each vessel involved and returned to us the completed and signed copy of the check list prior to commencement of STS operation.

MOORING MASTER (POAC)

We will provide a Mooring Master (POAC – Person Overall Advisory Control) who will advise during the berthing and unberthing of the vessels and supervise the transfer. The Mooring Master will remain onboard for the duration of the operation. In order to comply with Standards of Training, Certification and Watchkeeping (STCW), where it is deemed necessary to provide an additional mooring master, we reserve the right to re-quote accordingly.

The respective duties of the Mooring Master and the master of the vessels are set out in the Standard agreement. The Mooring Master is not directly responsible for cargo transfer but will nevertheless co-ordinate cargo operations to assist in ensuring that these are conducted in a safe and controlled manner. Our Mooring Master is certified to the standard required by MARPOL Chapter 8.

Upon request from the company or the vessels involved in the operation(s), Oceane Fenders DMCC will supply details regarding the qualification and experience of the assigned Mooring Master (POAC). In order to comply with data protection legislation including the Data Protection Act 2018 and the General Data Protection Regulations (GDPR), Oceane Fenders DMCC will not share the details of assigned mooring master (POAC) with third parties.

INDUSTRY REGULATIONS

Oceane Fenders DMCC confirms that its operations are conducted in line with industry publications and guidelines, for the applicable cargo being transferred by STS, including but not limited to:

a) MARPOL 73/78/97 Annex 1 Ch.8; 'Prevention of pollution during transfer of oil cargo between oil tankers at sea'

b) IMO's "Manual of Oil Pollution", Section 1, Prevention, Chapter 6

c) ICS and Oil Companies International Marine Forum (OCIMF) Ship-to-Ship Transfer Guide for Petroleum, Chemicals and Liquefied Gases (First Edition 2013)

d) SIGTTO

TERMS & CONDITIONS

As per our standard indemnity terms and conditions, a copy of which can be provided on request, Operation can be carried out based on availability of Equipment, Mooring Master, etc. at the time of confirmation. Please confirm your acceptance of this quotation in writing, to include Your Reference No. if any and full style for invoicing purposes, if you wish to proceed with the operation.

Oceane Group Standard Agreement for Ship to Ship Operation are provided with this quotation and form part of the contract between both parties, If, for whatever reason, the Ship-To-Ship Transfer Agreement is not signed prior to commencement of the proposed STS operation, the client by accepting the STS services nonetheless agrees by conduct to the provisions and conditions of such agreement as fully as if such Agreement had been signed.

Please be advised that this quote is applicable for the above-mentioned date range. If the ships are delayed at previous ports or ETA's change resulting in the change of STS dates, then please note we may not be able to guarantee STS equipment availability hence please keep us closely advised if any date changes in the STS operation. Client to advise date range upon confirmation of operation to be narrowed/agreed 48 hours prior to commencement of operation. If there is any delay over 48 hours prior to the operation, we will charge you a standby rate for our STS Mooring Master of US $1500.00 per hour or pro rata. This offer is made on the basis of a normal commercial Ship to Ship Transfer operation. If in the event the operation is of a nonstandard, emergency or salvage nature special conditions apply and can be supplied on request.

DAMAGES AND DELAYS

Whereby the special nature of the proposed operation unforeseen costs is incurred (e.g. extra equipment requirements, additional boat services, additional STS Superintendent(s) or personnel, diving inspections.) Then this will be for the Company's account as an Additional Cost, where arranged by Oceane Fenders DMCC.

OIL SPILLS AND POLLUTION

In the event of oil spill or any form of pollution, or if the equipment supplied is used in Polluted waters and any part of the equipment has been contaminated, be it by chemicals, oil Products or other pollutants, the cost of any cleaning and disposal of pollutant required to Return the equipment to its former state will be solely for the Company's account. During such Process, any hire or purchase charges for replacement equipment (if required) shall be Additional Costs to the Company were arranged by Oceane Fenders DMCC.

CANCELLATION OF OPERATIONS

Should the STS operation be cancelled (or moved to an alternative location) less than 48 hours prior to the original date of commencement, we reserve the right to charge a cancellation fee. Such a fee will represent only actual costs incurred- e.g. STS Mooring Master (expenses and flight) STS equipment mobilization etc. We will of course ensure all costs are kept to a minimum.

EMERGENCY PLAN

In the event of an incident or emergency, if you require us to follow your procedures, please forward a copy of your emergency plan and contact details at a suitable time prior to commencement of operation.
